

CANCELLED: ROXBY – LIAISON MEETING 28 FEBRUARY 2018

Update from Annie Ward North Lincolnshire Council:

'No complaints received in relation to the site (odour, noise, flies, etc.).

Since the beginning of February, the household waste collected by the council has been going for processing into fuel for energy generation and not into Roxby landfill. We collect from households and deposit into our waste transfer station on Midland Road in Scunthorpe. The contractor then takes the waste away to their processing facility over the River Humber at Melton so none of our household residual waste is going into Roxby anymore.'
