ROXBY LANDFILL SITE UPDATE

Dear Local Residents,

I would like to start by informing you that we are currently going through a transition period at Roxby Landfill. James Harrison has moved on to another role within the business and I have taken over the role as site manager.

I would also like to provide you with an update on the ongoing works at Roxby Landfill.

We are currently landfilling within phase 10 with road and rail tonnage.

Permanent Gas Well Installation: -

We successfully installed an additional 11 permanent gas wells. This included 7 wells in phase 10, 2 wells in phase 4 and 2 wells in phase 5. These works were completed by the end of July. The deep gas wells will target gas production deeper within the waste mass.

LLDPE Permanent Capping Works: -

The site is a fully engineered landfill and this summer we took advantage of the good weather to further place permanent LLDPE plastic capping within Phase 10. This continues from the installation of permanent capping works that were carried out in phase 13, at the northwestern corner of site.

Utilising this LLDPE plastic capping forms an engineered barrier between the landfill and the surface, thus minimising the amount of open area and maximising the capture of landfill gas which is a potential odour source.

These works began on the 5th of August, and we expect them to be completed by October.

We have continued to place restoration soils on permanently capped areas whenever the material is available.

We will continue to liaise with the Environment Agency, local councilors, and the local MP to ensure all parties are aware of progress and will provide updates to the liaison group. If you wish to discuss this update further, please don't hesitate to contact us by email: - roxbylandfill@biffa.co.uk or contact the site weighbridge on 01724 733336.

Regards

Matthew Lamming

Site Manager
